

Thank you for your interest. The high school grants for the 2016-17 school year have been awarded. Please join us in congratulating the recipients of the grants.

An application will be posted in September 2017 for the 2017-18 school year. We welcome and encourage all Burlington County high schools to apply (Note: multiple applications for different groups within one school will be considered).

**1st Place in the amount of \$1,000** – Holy Cross Academy – Key Club at Holy Cross Academy Key Club joined with “Together We Rise” to provide “sweet cases” for foster children living in Burlington County. The cases provide foster children with a decorated duffel bag filled with teddy bears, blankets, personal hygiene items, coloring books and crayons.

**2nd Place in the amount of \$500** – Doane Academy – Kindness Project  
The Kindness Project is a student-driven organization whose goal is to make a lasting impact on the local community. The Kindness Project participates in several community service initiatives in the area, including a partnership with the Ronald McDonald House. The students travel to the Ronald McDonald house and prepare dinner for, and spend time with, the families staying there.

**3rd Place in the amount of \$300** – Willingboro High School – National Honor Society  
The National Honor Society members at Willingboro High School visited local elementary schools within the Willingboro School District and read to the young children for “Read Across America” day. The funds provided allowed the students to purchase books to distribute to the students and it is their hope to instill a lifelong love of reading.

**4th Place in the amount of \$200** – Rancocas Valley Regional High School – Diabetic Warriors  
The Diabetic Warriors is a group of Type 1 Diabetic students at Rancocas Valley Regional High School led by a T1D teacher and the school nurse. A lunch and learn is provided monthly for the students to discuss issues that they may deal with on a daily basis. Speakers include medical health professionals from local hospitals, the Juvenile Diabetes Research Foundation and the American Diabetes Association. This grant will assist the students with their goal of broadening their reach to include a regional support network for all families dealing with T1D in Burlington County.
